METAL MESH FABRICS

# RING MESH

## SMALL RING MESH

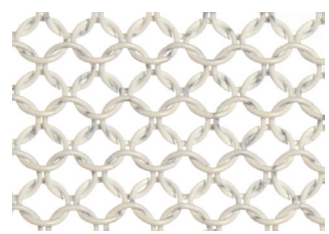

**Ring outer diameter:** 0.160" / 4.06mm  
**Weight (Stainless):** Approx. 0.576 lb / sf  
**Material:** Stainless steel

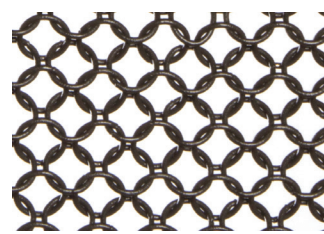

## LARGE RING MESH

**Ring outer diameter:** 0.275" / 6.99mm  
**Weight (Stainless):** Approx. 0.63 lb / sf  
**Material:** Stainless steel

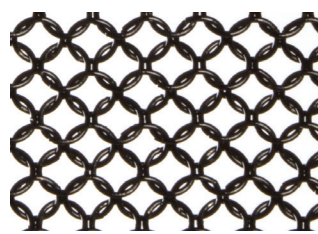

## FINISHES

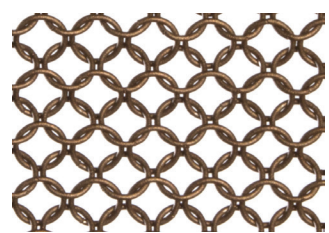

White

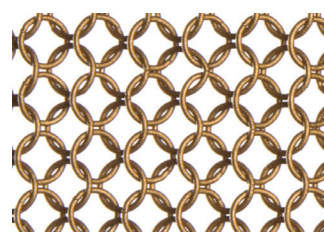

Gunmetal

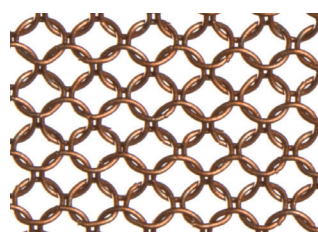

Black

Bronze

Gold

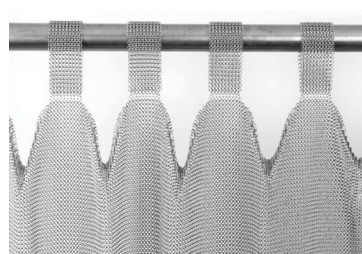

Copper

Ring Mesh Drapes are available in Natural Stainless Steel, 6 standard Enamel colors or a custom color of your choice. \*Please note: Natural stainless steel finish is not plated and small color variations between the panels that may be woven together to comprise the actual width and length will sometimes be visible.

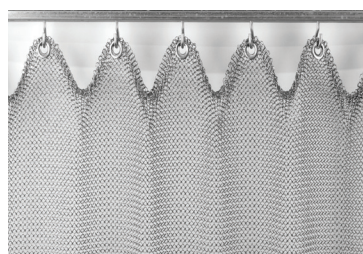

## HANGING OPTIONS FOR RING MESH

Rings

Tab Top

Small Grommets

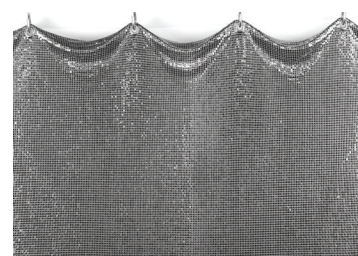

Large Grommets

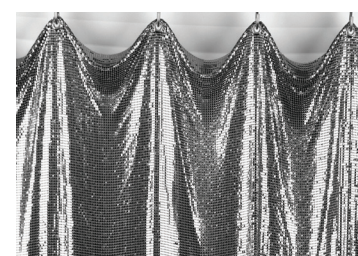

## FULLNESS OPTIONS

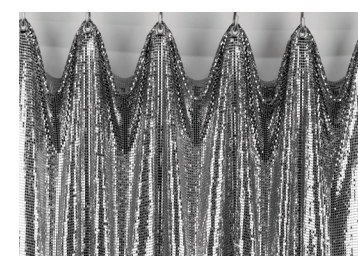

Spider mesh shown. A minimum fullness of 20 percent is required to achieve a semi-flat natural fall. For accordion folds, a minimum of 60 to 80 percent fullness is required.

Flat

50% fullness

100% fullness

## ADDITIONAL PROPERTIES OF METAL MESH DRAPERY

**Permanent:** Metal Mesh Drapes' unique longevity and low maintenance prove it more economical than other fabrics over the life of the installation.

**Maintenance Free:** Metal Mesh Drapes tend to shed dust. An occasional brushing or dusting will suffice. Stains wash off with mild soap and water.

**Fireproof:** Fire rating Class A, non combustible. Its melting point is that of the base metal.

**Air Conductive:** While effectively concealing heat and air conditioning outlet, Metal Mesh Drapes permit the relatively free circulation of warm and cool air currents.

**Stable:** Metal Mesh Drapes neither shrinks nor stretches in use.

**Malleable:** Metal Mesh Drapes can be hung in strips, panels or joined to create a metal fabric with superb draping characteristics.

**Mildewproof:** It is unaffected by dampness and humidity.

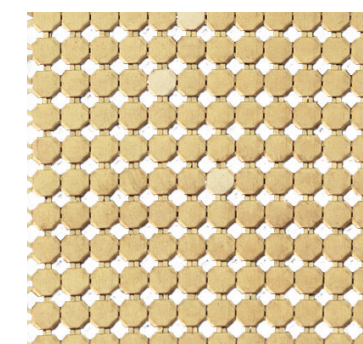

**Sunrot-proof:** It is impervious to even intense tropical sunlight.

**Light Diffusing:** Metal Mesh Drapes have exceptional light filtration properties. The degree of light control is conditioned by fullness and prevailing light conditions.

**Reversible:** The ring mesh fabrics are reversible, with the spider mesh fabrics offering two beautiful looks that can be used either as front or back.

# SPIDER MESH

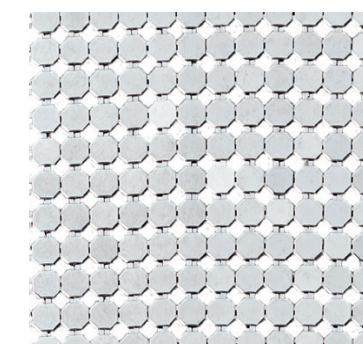

## SMALL SPIDER

## BRASS FLAT

**#70 spider size:** 0.157" / 4mm  
**Weight:** Approx. 0.481 lb / sf

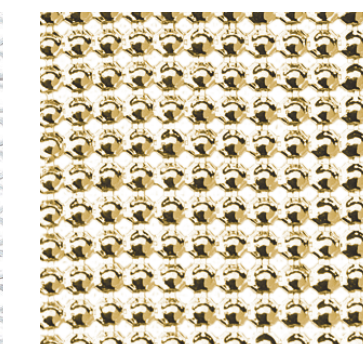

Flat brass mesh is manufactured with a smooth "spider" connecting to four individual rings. With a light reflective surface that can be either plated or enameled, flat mesh creates a shimmering metal fabric that looks delicate but is unbelievably flexible and fluid.

## STAINLESS FLAT

**#71 spider size:** 0.157" / 4mm  
**Weight:** Approx. 0.481 lb / sf

Same qualities as the brass small spider. Excellent for exterior applications.

## BRASS BUBBLE

**#71 size:** 0.157" / 4mm  
**Weight:** Approx. 0.481 lb / sf

Made in a similar manner as flat mesh, but with a convex 'spider', individual brass 'bubbles' create a simple, yet lustrous pattern of texture unlike any material.

## FINISHES

**Natural Brass (gold)**  
**Plated Finishes:** Platinum  
**Enamels:** Gunmetal, Bronze, Black, White and custom colors.

## LARGE SPIDER

## ALUMINUM

**#91 size:** 0.310" / 7.78mm  
**Weight:** Approx. 0.48 lb / sf

This lightweight aluminum mesh is manufactured with a slightly curved 'spider' that connects four individual flat aluminum rings. Developed for large application such as draperies and room dividers. Multi color panels can be joined to together to create a contemporary look.

## FINISHES

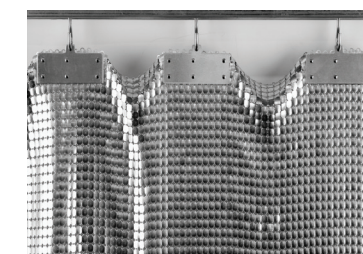

**Natural Aluminum**  
**Enamels:** Copper, Bronze, White, Gold, Black (not shown) and custom colors.

## PRINT

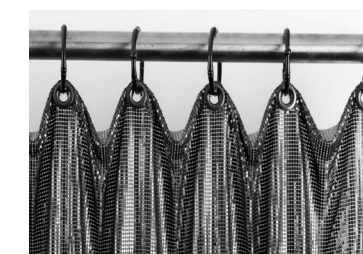

**Digital Printing**  
 Both small flat spider and large spider mesh fabric can be digitally printed.
